

El negacionisme climàtic organitzat:

Estructura, finançament, influència
i tentacles a Catalunya

Ferran Puig Vilar

Ateneu Barcelonès,
15 de novembre de 2012

Negacionisme

“El negacionisme climàtic consisteix en un escepticisme fingit o irracional pel que fa als resultats de la recerca al terreny climàtic, expressats aquests darrers rigorosament mitjançant el mètode científic i el procés d'avançament de la ciència, i que responen a una realitat objectivament verificable. El seu objectiu és evitar, o si més no retardar, l'endegament d'accions correctives per la via de crear dubtes infundats sobre el conjunt de l'opinió pública.”

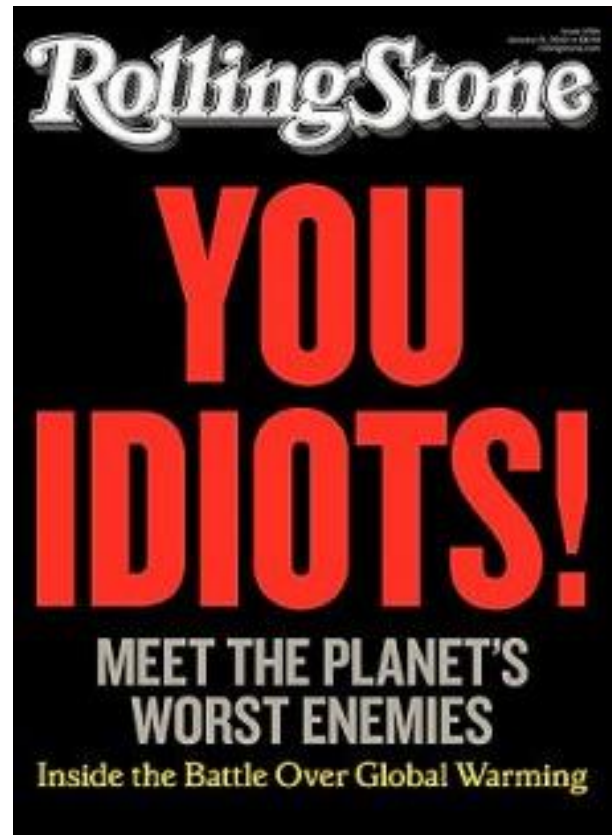

Doubt is our product since it is the best means of competing with the "body of fact" that exists in the mind of the general public. It is also the means of establishing a controversy. Within the business we

recognize that a controversy exists. However, with the general public the consensus is that cigarettes are in some way harmful to the health. If we are successful in establishing a controversy at the public level, then there is an opportunity to put across the real facts about smoking and health. Doubt is also the limit of our "product". Unfortunately,

¿Escèptics? ¿O negacionistes?

What On Earth

Richard Alley on Earth's Biggest Climate Control Knob

Posted on Dec 28, 2009 11:19:29 PM | NASA Earth Science News Team | 3 Comments

2009
AGU FALL MEETING
14-18 DECEMBER • SAN FRANCISCO

The Biggest Control Knob

Carbon Dioxide in Earth's Climate History

**Richard B. Alley,
Penn State**

Please note: I work for
Penn State University,
And help UN IPCC, NRC, etc.,
But I am not representing them,
Just me.
Bjerknes Lecture, AGU, San
Francisco, December, 2009
